If you have a smartphone I have an iPhone you can beam your

music and phone calls through the deck. Pairing was a simple one time process. Now, whenever I get in my car, my iPhone autopairs with the deck in 1015 seconds. The iPhone beams my music to the deck. The quality is very good. I cant tell the difference between bluetooth and my aux cable, and I have quality aftermarket speakers installed. I have yet to see a deck that accomplishes this in way that isnt extremely clumsy, slow, and unintuitive. So, to be clear, I just scroll through my list of songs on the phone and when I press play on the phone I hear the sound through the car audio system. If you get a call during a song or podcast, or whatever, the music will fade out gracefully and youll hear a ring through your car speakers. One press of the volume knob answers the call. You dont have to speak into your phone. There is a microphone in the faceplate of the deck. There are two settings for low and high sensitivity on the mic. The default is low, but I found that high sensitivity works better in my car, but it probably picks up more road noise. The call quality is good. My friends cant tell the difference between a call through the stereo and a normal call. When youre done with the call, the music will fade in gracefully right where you left off.

In conclusion, this really is the ideal solution for both handsfree calling and music in your car. It works better than I hoped. I havent used the radio, the CD player, or any other feature, so I cant comment on those. But really, who cares about any of that stuff. All that matters is the quality of the bluetooth interface, and this deck has that. Theres no need to spend a small fortune on a fancy, flashy deck. The smartphones of the future will have better music streaming, podcasting, voice controls, navigation, hd radio, etc. My advice is to get a good phone and a cheap deck with good bluetooth like this. Not too difficult to install but youll need to purchase the harness in addition to the radio and probably another installation kit to fill whatever space leftover. Relatively easy control. The best part is the blue tooth connection with iphone is flawless from the beginning and easy to use to answer phone, or play ipod songs on your radio. However, the reception for the radio SUCKS!!!! Even the strongest signal radio is barely there. if you listen to Radios a lot. Dont get this. Please try again later. The display its merely informative, so dont expect to see an Ovni from one side of the display to the other side. Overall, Im happy with the purchase. No USB you know that, the BT option its what I needed to stream music. Im not into Car Audio and all that s.

and just want a really nice sound not loud to make a party but good enough to listen every single instrument in a good song, BT option and phone calls. This is it. Please try again later. Please try again later. MDyrhaug 4.0 out of 5 stars I wanted to stream audio and podcasts from my Android to give me something new to listen to on my way to work. The price on this radio was great. I spent a good percentage more buying the new wiring harness, faceplate and antenna adapter. Although that would be true with any aftermarket radio. This installed nicely. Depending on your car, you may need to be comfortable removing large portions of your dashboard. Just go slow and it should not be too difficult. In fact, I found a nice video on YouTube that showed me exactly what to do for my make and model of car. For about three weeks after I installed this, my blue tooth streaming music would skip and it was pretty annoying. However, I found that I needed to turn off WiFi on my phone to make it stop skipping. I think this is a problem with my phone, not the radio. I am looking into a tasker app that will automatically turn my wifi on and off whenever it connects to the Sony radio. I think this will make my life easier. The phone integrates nice. Music fades, Phone rings, push big button on radio to answer. Caller ID would have been a nice touch. The microphone is good enough for quick calls but if you think you will have extended calls, I would recommend trying the external microphone and putting it somewhere near your steering wheel. The display is easy to read, the radio scans stations fast, the music fades in the morning instead of jumping straight to the level

you last had it. Overall, I am very happy once I figured out that I needed to turn off my wifi. Please try again later. Please try again later. vik 5.0 out of 5 stars With the Metra harness adapter it was installed in 30 minutes 15 minutes to splice into the harness.

1 To remove the original face deck, pull out the ash tray and push down on the metal tongue. The entire ash tray assembly pulls out. 2 Starting on the bottom, pull out the plastic frame cover. You have to really give it some pull. Yes, the cigarette lighter assembly comes out also. 3 Put the car into D or D2, this way you can sweep the plastic frame out of the way since the cigarette lighter and ash tray light are connected, and then put back into park. 4 unscrew old cd deck and remove. 5 The cage protector will NOT fit in the camry. Throw it away. Use the original camry brackets and a metra pocket. It makes for a new factory finish. Not too many options as to where you can screw in the brackets. 6 I ignored the orange dimmer wires from the metra harness, since that option is not there on the sony. 7 Install the sony. It sounds great. It synced via bluetooth with my iphone, on my first attempt. Calls are received and the other side hears me real clear. BT music is clear and without stutter. Factory speakers sound great now. I strongly recommend this for anyone looking to upgrade their factory CD deck. Please try again later. Please try again later. Ostrom 5.0 out of 5 stars We travel a lot and like to have music when we travel. The old radio had a cassette player who has heard of that and a 6 cd player. The cassette is worn out and the cd player doesn't work and never accepted mp3. The MEXBT2800 is just fantastic. I can stream the music from my Droid and handle my phone calls via my radio all with bluetooth. This radio solves problems I never knew I had.

Installation was a snap if you bought the wire harnesses and used four 8 penny nails instead of the tool. The MEXBT2800 will also accept mp3 cds if you don't have an Ipad or smart phone. Please try again later. Please try again later. TONYG 4.0 out of 5 stars Originally we purchased it from Best Buy at a sale price. When I called Best buy they were not offering the sale price anymore and that's when I decided to shop on line. I came across amazon.com web site and found the exact same Sony MEXBT2800 that was at a great price and plus no shipping cost!!!! Wow my wife and I were sold and it arrived at our home less than a week. I just snapped in the stereo and we are back to listening to great music again. We love this product and would highly recommend it to anyone else. Looks great, sounds great, and at a great price too. Please try again later. Please try again later. Látzólag minden kezelőszervre reagál, csak a hang hiányzik lenyegében az eredeti hibajelenség visszatért. Javítás 2 Kipróbálás után pár perc után egy pillanatra elnevel, majd teljesen elhallgatott. Sem magnóról, sem rádióról nem szolgáltatható meg. A hangrész állításra a kijelző reagál, de hang nincs. Ha kikapcsolom, de áram alatt marad, akkor továbbra sem ad hangot bekapcsolás után sem. DE, ha orákig áramtalanítva van, akkor megint pár percre képes rendesen szólni. Amit mertem Először, a nem működés ellenőrzése. De nem. A feszültségek a processzor és a nem működés tranzisztorokon is normálisak.

A végző IC sem kap nem működés jelét stb, mute. Mertem a hangfrekvencias jelét. Az IC331 egy TDA7406T igencsak multi ic. Bemenetválasztás, hangrész szabályzás, EQ, spektrum analízis, FM stereo decoder, stb. Az MPX jel megérkezik a bemenetre, de amikor nem működés van, akkor a kimenetein semmi nincs. Szerintem rendellenesen melegszik is. Nem túlzott, de a feszültség szabályzó IC-n kívül ez a legmelegebb. Van megegy hibajelenség, ami zavar Amikor elnevel, egy pár percig kijelző szinten is rendben működik, meg az MPX jel változásából is látom, hogy ok lenne, csak a TDA IC-ből nem jön jel. DE egy idő múlva mer ez sem igaz. Nem áll meg a keresés. És a kérdés Okozhat a TDA7406T onmagában ilyen hibajelenségeket. Mondjuk kicserélni nem tudnám, mert nem lehet kapni HQ, Farnell, TME, ASWO, EBAY. Előre is köszönöm! Gabor SONY CDXG1002U 2db smd alkatrész beazonosítása.Megoldva! Sziasztok! A cimben említett autoradio nem csinál semmit. A készüléket szétszedve az előlap felé semmi tap nem megy. Mi lehet ez Egyik barátom keresett meg ezzel a ford gyári fejegységgel. Használtan vett kocsit, akkucsere után derült ki hogy a radio kódot ker. A szerviz a papírok bemutatása után 10.000 Ft-ot ker a kód megadásáért. Ez azért kicsit soknak tűnik, mivel nekik pár perc lenne kikeresni az adatbázisból. Megigertem hogy kiolvasom az eepromból, de sajnos a kód az MCU-ban van. Ilyent meg nem csináltam, és nem akarom elrontani a készüléket akkor inkább menjen a 10 ezres kód megadás a szervizben. A sorozatszám M006142. Ebből is ki lehet nyerni online kalkulátorral, de ez is fizetés és szerintem nem elég megbízható ezért nem szívesen fizetnek nekik. Melyik megoldás lehetne az egyszerűbb Esetleg valaki ki tudja a sorozatszámából deríteni a kódot Előre is köszönöm!
